

Figure 1: Residents (millions) by UK constituent country and sex

2011

**Usual residents**

	Northern Ireland	Wales	Scotland	England
Males	887,323	1,504,228	2,567,000	26,069,148
Females	923,540	1,559,228	2,728,000	26,943,308

1. Data are rounded to the nearest thousand persons.
2. The 1911 Northern Ireland population is created from aggregating the constituent Counties (Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone) and the Belfast and Londonderry County Boroughs.
3. Northern Ireland Census date was 1926.
4. Northern Ireland Census date was 1937.
5. There was no census undertaken in England and Wales or Scotland in 1941 due to the Second World War.
6. Change and percentage change for 1951 reflects change over twenty years.
7. UK population calculated using mid-year population estimates. See background note 3 for further information.
