Subject: Bovine TB: Testing and compensation statistics

Dear Sir/Madam,

I would be grateful if you could send to me, or direct me to, the cost of testing and compensation in each financial year and the number of animals slaughtered and tested in each month from 1998 to 2010 inclusive for the Irish Republic.

If you think you may be able to send to me this data, and would like more definition of what I require, I would like to compare the data which you send to me with data shown on the following page.

http://www.bovinetb.info/cost_of_testing_and_compensation.php

Please note that I am an individual who only has a personal interest in bovine TB and do not represent or work for any organisation with a vested interest such as a press or media organisation.

Yours faithfully,
