England (Total)	1668	77091	1885	74488	1996	71931	1324	71221

### Notes

(a) Provisional data, as downloaded from Defra's Animal Health Database (Vetnet) on 28 January 2009 and covers the period from 01 Jan to 31 Dec for each year (1998-2007)

(b) Provisional data, as downloaded from Defra's Animal Health Database (Vetnet) on 11 February 2009 and covers the period from 01 Nov 2007 to 31 Oct 2008. TB stats data are produced 3 months in arrears to allow culture tests results to be finalised and for resolution of any unclassified incidents.

(c) Provisional data, as downloaded from Defra's Animal Health Database (Vetnet) on 28 January 2009 and covers the period from 01 Jan 08 to 31 Oct 08. It is not possible to cover the period from 01 Nov 07 to 31 Oct 08. The reports produced by Defra's Animal Health Database (Vetnet) can only provide data covering one calendar year.

### The following is a note added by the author of the clearstats site

It is perhaps worth noting that I have sourced / been presented with 3 sets of figures from DEFRA for the total number of herds and that the figures in the above tables represent the largest values.

## Cattle herds under TB restriction from 1998-2008
